Introduction

In recent time, market share of Bitcoin is reduced to around 30%, its lowest since the inception of cryptocurrency era. However, the rise of Altcoins is not utilized much by any lending platform except long term investors.

Bitcoin (BTC) has dropped over 8 percent in the last 24 hours, as was indicated by the bearish reversal pattern on the daily charts and head-and-shoulders breakdown on the hourly chart.

As of writing, Bitcoin had dropped to \$9,958 - down 16.72 percent from the recent high of \$11,958 hit on Feb. 20.

Altcoins has recently surprised the market with its rapid value increase against the Bitcoin. This has always been a strong potential for value increases in the cryptosystem and Altcoins are the major success story. Altcoins, as believed, will continue its dominance over Bitcoin in 2018.

Altcoins are much faster than Bitcoin. For example, the Litecoin blockchain can run as much as 56 transactions per seconds while the Bitcoin runs a meager 7 transactions per seconds. Litecoin has a block time of 2.5 minutes; 4 times greater than the 10 minutes' block time of Bitcoin. All these proves the better function of Altcoins as transactions means. Altcoins are faster to confirm on the blockchain. Let's not even talk of the ever dropping of Bitcoin by merchants as a form of payment.

Bitcoin, no doubt, has a larger pool of miners. Each miner has differing opinions and ideals on how to take the currency forward. Hence, concordance is not expected in the Bitcoin world. A very recent example is the debate that led to the forking out the Bitcoin Cash. Well, what of the Altcoins? Altcoins, generally, are known as being more stable, steadier and robust growth in value compared to the Bitcoin.

Altcoins are beneficial in that it gives investors the diversification of risks, are more volatile and thus are more advantageous in terms of trading.

Executive Summary

Altron is purposefully designed to be different. Whilst satisfying the human quest for financial stability, it also serves a purpose of making life better. Altron is a lending platform, ethereum blockchain-based of the cryptocurrencies, Altcoins. Our bot trade with altcoins and the profit is shared by investors. The adoption of smart contract contracts make transaction private and safer.

Here at Altron, we would utilize the rise of Bitcoin alternative and would pump up the undervalued yet promising Altcoins via hybrid trading which includes following:

- ✓ **Arbitrage:** What is arbitrage? Simply put, its buying low in one place and selling high in another at the same moment in time. You can find those opportunities when you can see big gaps in trading volumes between different markets or exchanges. This platform will bring you the best opportunities for doing such trades. Arbitrage is made possible by a clear difference in trading volumes of different markets.
- ✓ **Trading:** Trading is not part of the regular stock exchange. The Blockchain technology has been hailed as the backbone of the future financial system. Using the blockchain technology, the platform will provide a venue to buy and sell cryptocurrencies. The blockchain technology will receive information to verify the transactions.

The Concept

Digital currencies have brought a change in our thinking of what money is and we have observed various forms of cryptocurrency since its launch in 2008. With bitcoin starting the trend, more and more cryptocurrencies have shown more improvements to their blockchains. Altcoins are amazing facets of the cryptosystem.

Altcoins is an abbreviation of “Bitcoin alternatives”. Hence, Altcoins refers to every single cryptocurrency except for bitcoin. Altcoins are developed to either better conditions of the Bitcoin or replace it. Different strokes for different folks. The Altcoin community have taken the principles of cryptocurrency and developed their own model.

Till now people are investing & trading in major cryptocurrencies. All lending platform exist in market are mostly trading in Bitcoin or Ethereum. However, there are ample amount of altcoin which are undervalued even if their vision or features are promising. Additionally, liquidity is more in altcoins than major crypto like Bitcoin and Ethereum. For example, if Bitcoin or Ethereum fluctuate about 10-20%, Altcoin goes up by 100-200% and even 1000% in a day in some cases. Our bots identify signals of those altcoins and makes maximum profit which we would share with you.

Here at Alltron, we provide the opportunity for our community members to earn regular and sustainable profit through our highly profitable altcoin trading bots. We offer **up to 10% weekly interest** plus a Jackpot week every month where you will get **5% additional interest**. So you can earn up to **45% interest every month**.

Apart from lending interest you can earn profit on staking your coins. You can earn 2.5% weekly staking bonus which is 10% per month (For first 6 Months).

How we would make money?

You must be interested to know how we would make money. Just as we have mentioned in introduction, we would trade in Altcoins with our bots by 2 methods.

- **Arbitrage (When market goes downside and trading does not make decent profit).**
- **Trading (When Market is moving upward)**

Specifications

Coins specs will be added later.

Coin Distribution

Share	Distributed for
50%	Investors (Including 10% Crisis Reserve)
35%	Developers & Core Team
10%	Marketing
5%	Rewards & Bounty

With Alltron, you can earn profit by 3 ways listed below.

1. Lending (Up to 45% per Month)
2. Staking (10% per Month for first 6 Months)
3. Trading

Now let's understand each features in detail.

LENDING:

This involves the profit gained from the amount gotten from the amount lent to our platform. Interest rate isn't fixed but rather depends on the investment.

When you lend your coins with us, you can earn profit up to 45% per month. You can earn up to 10% per week, plus there will be a Jackpot week every month where you can earn 5% additional interest on your lending amount.

Our latest trading bot would trade your coins with bitcoins and then with altcoins for the highest profitability.

Additional feature of lending platform is you can earn bonus interest every week depending upon lending amount. Below is the detailed lending structure.

At the end of locking period, you would get Alltron coins equivalent to principle lending amount and interest (equivalent to USD) would also be given in Alltron coin.

Lend \$100-\$1000

- At a locking period of 40 weeks
- Bonus Interest (per week) - NA

Lend \$1001-\$10000

- At a locking period of 32 weeks
- Bonus Interest (per week) - 0.60%

Lend \$100001-\$100000

- At a locking period of 25 weeks
- Bonus Interest (per week) - 1%

Lend \$100001-\$1000000

- At a locking period of 15 weeks
- Bonus interest (per week) - 1.25%

WHY WEEKLY INTEREST:

We do not believe in pump and dump of altcoin. We would trade in altcoin which have good potential but undervalued at the same time. Our trading bot would trade till the price of altcoin is stabilized, so that we can make decent amount of profit during this period which we would share with you.

Weekly trading gives us opportunities to swing trade in altcoins. This strategy neither create any panic in market due to our entry nor dump the coin during our exit.

Additionally, weekly movement of a particular altcoin is greater than daily movement. Weekly trading gives us time to trade in multiple altcoins which guarantees regular and sustainable profit to our team at Alltron & you.

USP (UNIQUE SELLING POINT):

There are multiple lending platforms in the cryptocurrency world. However, most don't let you withdraw your principle amount before end of locking period. We believe you should have freedom to take your amount back at your wish. Our investors are given the freedom to access their funds on daily basis as well as withdraw even the capital after the lending period.

We are here to change the rule. ***You can withdraw your principal before end of locking period** amount by a small processing fee. Below is the processing fee structure.

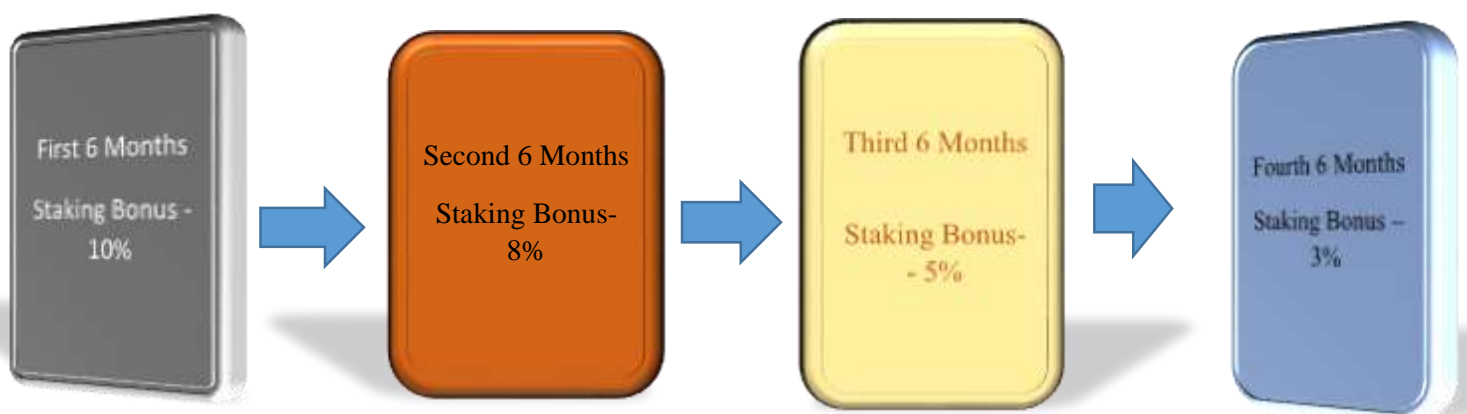

*To withdraw your amount before end of locking period, you need to keep the amount for at least 4 weeks.

Staking:

It's a simple process. You get the coin from the Alltron platform. You can hold on to the coin you have just bought from the platform with the expectation it will rise a good amount from what you have bought it for. This is called staking.

From staking, you can earn 2.5% fix interest per week which is 10% per month for first 6 months. You can end the staking at the end of any week. Detailed staking structure is mentioned in below table.

TRADING

A highly developed trading system will be employed. You can trade Alltron coins against Bitcoin on our internal exchange once the exchange is open. You can earn profit through trading Alltron coins on other exchanges whenever we get listed on those exchanges. You keep watching the price rise and eventually it will be worth the amount you decide to sell on the first place. This can be 10 USD or 100 USD. It might even become 1000 USD but we cannot predict the future. Neither can you or else you would have bought Bitcoin at 0.10 USD five years ago. Once Altron coins become available for trade on the External exchange, you can instantly profit from a significant price rise. We, however, predict that the value of Altron coins will rise significantly.

With your lending interest and staking bonus, which are weekly earnings, you can trade these with others with enormous profit.

We are aiming to add more pairs on our exchange once our platform is live, secured and stabilized. By this way you can trade Alltron with your choice of altcoins and make profit.

MINING OPTIONS

More details will come in due time.

PRE-ICO

Maximum pre-ico for sale	2,000,000 Altron coins.
Rounds	2
Round 1	1 million Altron coins at a price of \$0.40 with a 15% bonus
